Zitrux compact

QUICK GUIDE

1 DAILY CLEANING

What should I do at the **START** of the day?

Before opening, after the last sanitization of the night.

Open the peel filter door and remove the filter for cleaning.

Press “Restart” on the screen.

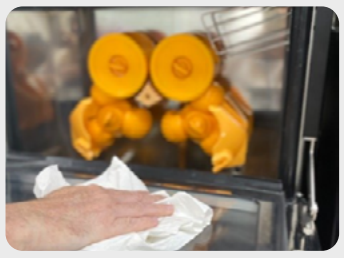

Place the tap return in the dispensing position.

Load fruit into the feeder.

What should I do **DURING** the day?

Clean the door glass and the drip tray area.

Empty the waste bin if it is full.

What should I do at the **END** of the day?

Before starting the automatic cleaning process

Remove the oranges contained in the feeder elbow.

Check the peel fall areas for any peels and remove them if necessary.

Open the peel filter door and clean the pulp and capsule covers.

Remove the waste bin and replace the trash bag with a new one.

On the main menu, select Cleaning → Sanitization.

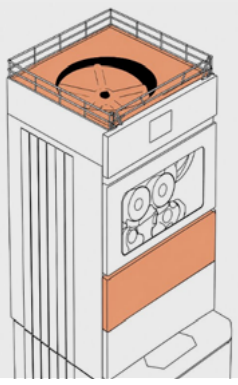

Extract the return box of the tap to place it in the washing position.

Important: Check the detergent level before each wash cycle

2 WEEKLY CLEANING

After completing the final daily cleaning, clean the **feeder** and the **capsule base.**

Note: *All pieces can be washed by hand or in the dishwasher.*

Remove the plate.

Remove the PulpOut filter, juice tray and mobile peel chutes.

Clean all removed components.

Check drains and floats, clean the capsule base and tighten the four knobs of the squeezing pressing units.

Clean the feeder and the feeder elbow.

Start the Rinse cycle from the Cleaning Menu.

3 MONTHLY CLEANING

Disassemble the **squeezing system** and the **inner elbow** to clean the capsule. Pay special attention to the upper area.

Remove the squeezing system in pairs and clean it.

Loosen the orange nut and remove the inner elbow.

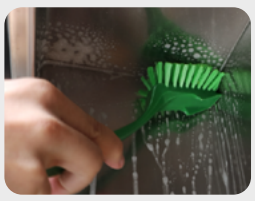

Remove the door rubber gasket.

Clean all removed components.

Place the red protective cover on the blade.

Clean the capsule, paying special attention to the upper area and corners.
